

4NPS PERMUTATIONS ON 3NPS SCALES

FOR GUITAR

JOSEPH PERKINS

Creative/technical exercise for all four-note variations on three-note-per-string scales.

Permutations of 'First, Second, and Third' notes per-string (1, 2, 3) without consecutive intervals are in bold text.

This will work for any 3nps scales (examples are provided as one bar Cmaj), practice in different rhythms, e.g. triplets, quintuplets.

Descending scales could follow the same numerical order or in reverse.
